

Hopetown Music Inc.

CONGRATULATIONS!

Thank you for choosing your new, hand crafted Steel Pan from Hopetown Music. This instrument was created for you by a fine little family shop in Trinidad, the birthplace of the Steel Pan instrument. It was built with meticulous attention to detail and is tuned to the A440 worldwide standard for musical instruments.

Your instrument is in reality a piece of hand formed metallic artwork upon which music can be played. We recommend that you maintain its sound quality and appearance by careful handling. Great care should be taken to see that the instrument is not dropped or dented in any way. The instrument should be occasionally cleaned with a soft cloth and soap & water. Care should be taken to dry the instrument if it becomes wet or is exposed to dampness. It should only be struck using rubber tipped playing sticks.

You own a quality musical instrument that will bring you many years of creativity and satisfaction. Steel pans from Hopetown Music deliver the best sound and the most fun when played with a positive attitude while bare foot!

Enjoy your investment! We guarantee it will take you to the islands whenever you want to go!

Best regards,

Larry Mebust
